A worthy companion to Abbeville's three very successful reference volumes in the series—ArtSpeak, ArtSpoke, and AntiqueSpeak—PhotoSpeak is an informative, user-friendly resource. The complexities of photographic techniques, from catalogue to digital imaging and beyond, are explained in clear, straightforward language. The international groups and movements of photography are elucidated in the same accessible who, when, where, what, format that has made this series so useful. And the aesthetic concepts and critical language used to explain (and often obscure) photography over the last century and a half are demystified in illuminating, enjoyable prose. A time line and a chart of all the movements complement the text and the original selection of images.

**PhotoSpeak**-Gilles Mora 1998

PhotoSpeak is the first reference to provide satisfying, easily accessible information not only about the diverse techniques that have been explored since photography was invented more than 150 years ago but also about the ideas and the influences that have been central to those making and interpreting photographs.

**Portrait and Candid Photography**-Erin Manning 2011-06-01

The secret to taking great “people pictures” is to observe your subjects, connect with them, and use your camera to its best advantage. Here’s how to work with lighting, location, angle, composition, physical characteristics, environment, and countless other variables, including the unique challenges of photographing babies, group activities, and action. Learn to capture facial expressions, tell a story with a series of candids, add interest to large-group shots, and more. Apply these techniques and watch your subjects come to life.
Calotype to the photogram to digital imaging are explained in clear, straightforward language, indicating how the processes work and how they shape the appearance of the resulting image. The international styles and movements within photography, from Pictorialism to postmodernism, are described using the same effective who-when-where-what format that has made the other volumes in this series (AntiqueSpeak, ArtSpeak, and ArtSpoke) so useful. Photography's many distinctive contributions to various subjects such as art, fashion, science, and travel are intelligently explored. And the aesthetic concepts and critical terms that have been used to explain (and occasionally obscure) photography over the last century and a half are demystified.

**The Social Photo**-Nathan Jurgenson 2019-04-30 A set of bold theoretical reflections on how the social photo has remade our world. With the rise of the smartphone and social media, cameras have become ubiquitous, infiltrating nearly every aspect of social life. The glowing camera screen is the lens through which many of seek to communicate our experience. But our thinking about photography has been slow to catch-up; this major fixture of everyday life is still often treated in the terms of art or journalism. In The Social Photo, social theorist Nathan Jurgenson develops bold new ways of understanding photography in the age of social media and the new kinds of images that have emerged: the selfie, the faux-vintage photo, the self-destructing image, the food photo. Jurgenson shows how these devices and platforms have remade the world and our understanding of ourselves within it.

**Principles of Design Through Photography**-Deepak John Mathew 2011-02-04 In an age of digital photography and advanced technology, viewers often neglect a photograph's composition and aesthetic value in favour of its informative value. Principles of Design Through Photography is an investigation of how a particular principle of design - rhythm, harmony, contrast, balance and symmetry - is used in a composition, and how that composition will, in turn, help the photographer convey an effective message to the viewer. Each composition aims to give a visual experience of the principle of design that helps to better perceive a photograph. Each principle of design has been isolated as much as possible so that it can be understood and used in combination with other design elements. This book is an introduction to the way in which photographs can be read and appreciated, and will delight students of photography, aesthetes and those who are curious about design and photography.

**Public Images**-Ryan Linkof 2020-08-12 The stolen snapshot is a staple of the modern tabloid press, as ubiquitous as it is notorious. The first in-depth history of British tabloid photojournalism, this book explores the origin of the unauthorised celebrity photograph in the early 20th century, tracing its rise in the 1900s through to the first legal trial concerning the right to privacy from photographers shortly after the Second World War. Packed with case studies from the glamorous to the infamous, the book argues that the candid snap was a
tabloid innovation that drew its power from Britain's unique class tensions. Used by papers such as the Daily Mirror and Daily Sketch as a vehicle of mass communication, this new form of image played an important and often overlooked role in constructing the idea of the press photographer as a documentary eyewitness. From Edward VIII and Wallis Simpson to aristocratic debutantes Lady Diana Cooper and Margaret Whigham, the rage of the social elite at being pictured so intimately without permission was matched only by the fascination of working class readers, while the relationship of the British press to social, economic and political power was changed forever. Initially pioneered in the metropole, tabloid-style photojournalism soon penetrated the journalistic culture of most of the globe. This in-depth account of its social and cultural history is an invaluable source of new research for historians of photography, journalism, visual culture, media and celebrity studies.

Prescriptive Memories in Grief and Loss-Nancy Gershman 2018-12-21 Prescriptive Memories in Grief and Loss: The Art of Dreamscaping introduces a wide range of therapists to a novel, strengths-based and imaginal practice for helping clients at various points on the grief and loss continuum. Grounded in recent empirical research on how the emotional brain encodes new memories, this book describes how to create a resource-rich "prescriptive memory." Chapters by internationally recognized authors explore the theory and application of dreamscaping from a transdisciplinary perspective, including protocols for use with individuals and groups and guidelines for collaboration with other therapists and professionals. Illustrated with full-color dreamscape images co-created by clients and therapists, this is an exciting and innovative guidebook to a new method for cultivating hope and promoting restoration and growth.

Mediating Nature-Sidney I. Dobrin 2019-10-31 Mediating Nature considers how technology acts as a mediating device in the construction and circulation of images that inform how we see and know nature. Scholarship in environmental communication has focused almost exclusively on verbal rather than visual rhetoric, and this book engages ecocritical and ecocompositional inquiry to shift focus onto the making of images. Contributors to this dynamic collection focus their efforts on the intersections of digital media and environmental/ecological thinking. Part of the book’s larger argument is that analysis of mediations of nature must develop more critical tools of analysis toward the very mediating technologies that produce such media. That is, to truly understand mediations of nature, one needs to understand the creation and production of those mediations, right down to the algorithms, circuit boards, and power sources that drive mediating technologies. Ultimately, Mediating Nature contends that ecological literacy and environmental politics are inseparable from digital literacies and visual rhetorics. The book will be of interest to scholars and students working in the fields of Ecocriticism, Ecocomposition, Media Ecology, Visual Rehtoric, and Digital Literacy Studies.
Seizing the Light - Robert Hirsch 2017-04-07 The definitive history of photography book, Seizing the Light: A Social & Aesthetic History of Photography delivers the fascinating story of how photography as an art form came into being, and its continued development, maturity, and transformation. Street Photography - Clive Scott 2020-09-15 Street photography is perhaps the best-loved and most widely known of all photographic genres, with names like Cartier-Bresson, Brassai and Doisneau familiar even to those with a fleeting knowledge of the medium. Yet, what exactly is street photography? From what viewpoint does it present its subjects, and how does this viewpoint differ from that of documentary photography? Looking closely at the work of Atget, Kertesz, Bovis, Rene-Jacques, Brassai, Doisneau, Cartier-Bresson and more, this elegantly written book, extensively illustrated with both well-known and neglected works, unpicks Parisian street photography's affinity with Impressionist art, as well as its complex relationship with parallel literary trends and authors from Baudelaire to Philippe Soupault. Clive Scott traces street photography's origins, asking what really what happened to photography when it first abandoned the studio, and brings to the fore fascinating questions about the way the street photographer captures or frames those subjects - traders, lovers, entertainers - so beloved of the genre. In doing so, Scott reveals street photography to be a poetic, even 'picturesque' form, looking not to the individual but to the type; not to the 'reality' of the street but to its 'romance'.

**Encyclopedia of Twentieth-Century Photography, 3-Volume Set**-Lynne Warren 2005-11-15

The Encyclopedia of Twentieth-Century Photography explores the vast international scope of twentieth-century photography and explains that history with a wide-ranging, interdisciplinary manner. This unique approach covers the aesthetic history of photography as an evolving art and documentary form, while also recognizing it as a developing technology and cultural force. This Encyclopedia presents the important developments, movements, photographers, photographic institutions, and theoretical aspects of the field along with information about equipment, techniques, and practical applications of photography. To bring this history alive for the reader, the set is illustrated in black and white throughout, and each volume contains a color plate section. A useful glossary of terms is also included.

**Projecting Words, Writing Images**-John R. Leo 2011-08-08

This compilation of essays by 20 scholars trained in comparative literatures, art history, critical theory, and American cultural studies further explores and expands the spirited and energetic field of visual cultural studies and its cognate or supplemental projects of “visual practices” and “visual literacy.” Their topics and perspectives engage contemporary re-theorizations of “text,” of “word” and “image,” while their alignments, ruptures, slippages and aporias fall across a range of media practices and institutions. These include photography and exhibition, film, television, entertainment, journalism, poetry and literature as visual and spectacular performances, and graphic narratives, but also their discursive intersections with “race” and ethnicity, their conjugations of gender, their tense and constitutive relations within multiple public spheres and (post)modernities.

**Beyond Memory**-Diane Neumaier 2004

Innovative and conceptual uses of photography within a highly developed Soviet dissident culture are explored in this examination of photography's place in late Soviet unofficial art. Simultaneous.

Creative Strategies for Library Instruction in the Arts, Literature, and Music-Marilyn P. Whitmore 2001 Active learning benefits everyone in all levels and types of libraries. Students, the general public, interns, and new reference staff need to find information and conduct research. One way to help them understand research strategies is to provide a structured opportunity to 'experience' information seeking. Librarians want learners to retain and apply what is taught. Finding material and writing research papers is a way of life in the schools, colleges and universities which most students attend. Students will continue to use the skills and techniques learned from library instruction throughout their lifetimes. This book includes seven lesson plans covering various topics in "The Arts,"
seven lesson plans in literature and communications, and six lesson plans in music. Each of the contributing authors is a specialist in his area of expertise and is sharing that knowledge with colleagues. It is an excellent resource for librarians planning sessions to undergraduate students in those disciplines. The format used is one in which each chapter is a lesson plan that includes active learning exercises. Library instruction librarians are able to save a great deal of time with the design of this unique book because the exercises can be easily customized to fit the needs of individual libraries.

Il "momento decisivo" nella Street Photography contemporanea. Henri Cartier-Bresson ed il momento decisivo nella fotografia di strada-Paolo Grandi 2019-05-02 Master's Thesis from the year 2019 in the subject Art - Photography and Film, grade: 110/110, University of Bologna (Arts Department), course: Visual Arts, language: Italian, abstract: Il presente studio ha l'obiettivo di inquadrare primariamente il fenomeno moderno del documentarismo e del suo aspetto artistico correlativo che, per comodità, continueremo a chiamare Street Photography alla luce delle teorie e pratiche storiche, con una focalizzazione sul momento cruciale della nascita del concetto di “momento decisivo” con Henri Cartier-Bresson e gli artisti che, venuti dopo di lui, si sono ispirati al suo pensiero. La ricerca affronta le tematiche filosofiche e artistiche in relazione alle principali questioni aperte in questo ambito: la riduttività della definizione del “genere” e la difficoltà di trovarne un succedaneo più adeguato; le relazioni altalenanti tra documentarismo e arte, tra documentare oggettivamente e comunicare soggettivamente la propria visione del mondo; l'aspetto antropologico sotteso alla pratica che consente di diventare testimoni del nostro tempo raffigurandolo a mezzo immagini; il collegamento sociale al territorio, allo spazio umano e alle espressioni artistiche dell’uomo nello stesso, come strumenti per il cambiamento sociale; la ripercussione del fenomeno del digitale e in particolare della fruizione ubiquitaria del mezzo nel contesto urbano. Per finire, la relazione sempre imprescindibile con l’attimo passeggero, che può trafiggere come il punctum barthesiano, e che può rendere questa forma d’arte un’espressione sublime; un linguaggio universale che non fa mai perdere la possibilità di memoria: ossia, quel segno “indicale” che ha contraddistinto da sempre il mezzo; e quella possibilità di trasmissione e di poesia, che sono qualità uniche della fotografia.

Cumulative Book Index- 1998 A world list of books in the English language.

Art Photography Now-Susan Bright 2006 "This survey presents the work of eighty of the most important and best-loved artist-photographers in the world today. Susan Bright has organized the book into seven sections - portrait, landscape, narrative, object, fashion, document, and city - each of which explores the diverse subjects, styles, and methods adopted by artists. Introductions to each section outline the genres and consider why photographers are attracted to certain themes, and how issues like memory, time, objectivity, politics, identity, and the everyday are tied to certain approaches. Each photographer's work is then presented in sequence, with commentaries by the author highlighting the art's most important aspects. Quotations from the artists appear alongside to offer valuable insights into their motivations, inspirations, and intentions." - inside front cover.
